Steven Mohre

Computer Science

smohre3@gmail.com | www.linkedin.com/in/stevenmohre-compsci

Education

Maryville University

August 2023 – December 2025

Bachelor of Science
Computer Science Major
summa cum laude
GPA – 3.9 – Dean's List

St. Louis Community College

August 2020 – May 2023

Associate of Arts, *cum laude*
Associate of Science, *cum laude*
A+ Scholarship
GPA – 3.5 – Dean's List

Soft Skills

Proficient in Adobe Creative Suite (Illustrator, Photoshop), Blender, AutoCAD, and Microsoft Office

Experience working with multiple software tools across design, modeling, and productivity environments

Strong mathematical reasoning and analytical problem-solving skills

Ability to communicate complex technical concepts to both technical and non-technical audiences

Knowledgeable in game development and interactive design principles

Technical Skills

Languages

Python, C++, C#, Java

Developer Tools

VS Code, Visual Studio, Unity, Git/GitHub

Libraries

NumPy, Stable Baselines3, TensorFlow, PyTorch, pandas, scikit-learn

Technical Skills

Machine Learning, Version Control, Reinforcement Learning, Deep Learning, Game Design

Databases

MySQL

Profile

Computer Science graduate with hands-on experience in multiple programming languages and development tools, demonstrating adaptability across diverse technologies and environments. Developed several video game projects using Unity and Adobe Creative Suite. Passionate about software development, game design, and expanding knowledge of computer hardware. Completed specialized tracks in Game Design and Artificial Intelligence at Maryville University.

Projects

Unity Projects

Physics-based Golfing Platformer (Unity, C#, Photoshop)

Implemented physics-driven movement and player state transitions between platforming and aiming modes using modular controller logic

2D/3D Coin Collection Game (Unity, C#)

Developed a dimension-switching system supporting synchronized 2D and 3D object states with consistent collision handling across environments

Ball Sorting Game, with Reinforcement Learning Agent (Unity, C#, MLAgents)

Trained an AI agent using reinforcement learning to optimize sorting behavior through reward-based policy updates

Collegiate Team Unity Projects

Auto-runner created for the 2025 Global Game Jam

Collaborated on a time-constrained team project implementing gameplay mechanics and debugging shared systems

A fixed shooter inspired by *Space Invaders*

Developed modular enemy spawning and projectile behavior systems

AI Projects

Indoor Image Recognition Model (TensorFlow, PyTorch)

Built and trained a convolutional neural network (CNN) to classify images across 61 indoor scene categories using a large-scale labeled dataset

Work Experience

General Laborer – June 2020 - Present

Wachter, Inc.

- Maintain company headquarters by meticulously pulling and spraying weeds, arranging tools and small equipment, and organizing the warehouse
- Travel to job sites to complete various tasks such as landscaping, fertilizing, and ensuring equipment logistics

Courtesy Clerk – March 2019 - March 2020

Dierbergs

- Bagged groceries and collected carts from parking lot in a timely manner
- Received several letters of recognition from customers for displaying exemplary customer service
